ABOUT ME

I'm a software engineer major at the Nguyen Tat Thanh University and I'm currently in my third year. As a passionate and enthusiastic young Developer, I have the desire to become a professional web developer. So, I want to find a dynamic work internship environment, especially in Website development to improve my skills and knowledge.

CAREER GOALS

Short-term goals:

Successfully complete the internship and build a personal brand in my career

Long-term goals:

In the next two years, I want to become a full-stack developer and have deep knowledge of web programming
